

IN SPANISH, IS IT EASY OR DIFFICULT?

As an intermediate language level student, we invite you to get out of the ease of the structures you already know.

In this exercise, for example, it's true that you could say: I'm good at math, but exploring other native and colloquial forms will put you at a higher level in your Spanish.

Say whether Juan finds it easy or difficult to do the following thing.

Se me dan muy bien las matemáticas: _____.

Se me dan fatal las lenguas: _____.

Soy un poco negado para la informática: _____.

Tengo facilidad para hacer amigos: _____.

Se me da fenomenal escribir cuentos: _____.
