OPPOSITES IN SPANISH ABOUT TECHNOLOGY

This is definitely very useful vocabulary.

The world of technology is truly our world today. It's true that many words are shared across languages, and most of them come from English.

However, there is vocabulary that is used in technology but easily transferable to many other contexts in Spanish.

Practice with the following. Match up the opposites:

- Conectarse (to connect)
- Subir (to upload)
- Instalar (to install)
- Comprar (to buy)
- Encender (to turn on)
- Apagar (to turn off)
- Bajar (to download)
- Desinstalar (to uninstall)
- Vender (to sell)
